SYNOPSIS

Student face difficulty in sharing notes specially during examinations. Also, teachers have difficulty in providing notes to all the students. For organizations as well there are times when they find it hard to make a particular set of document available to their people.

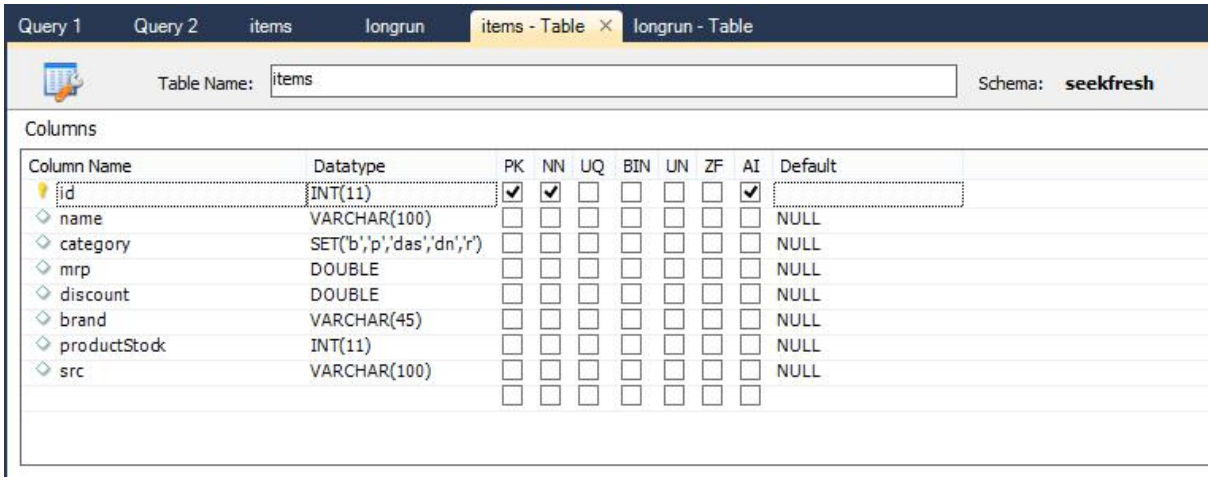
This project focuses on creating an online platform where all the users(eg. students of a branch) can access all the folders concerning him/her.

TABLE OF CONTENT

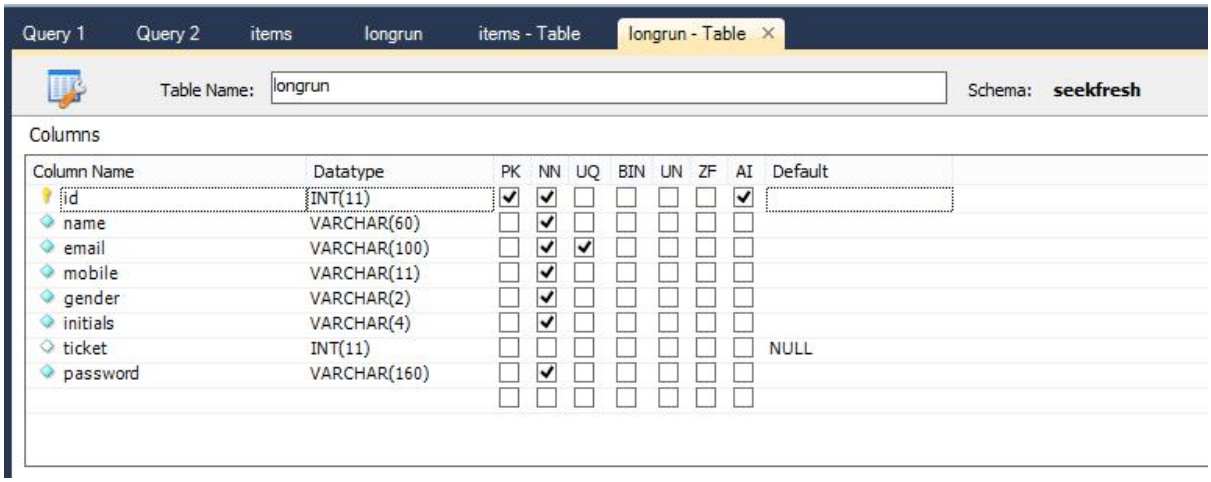
Content	Page No.
MODULE 1	4
MODULE 2	7
MODULE 3	24
SCREENSHOTS	33

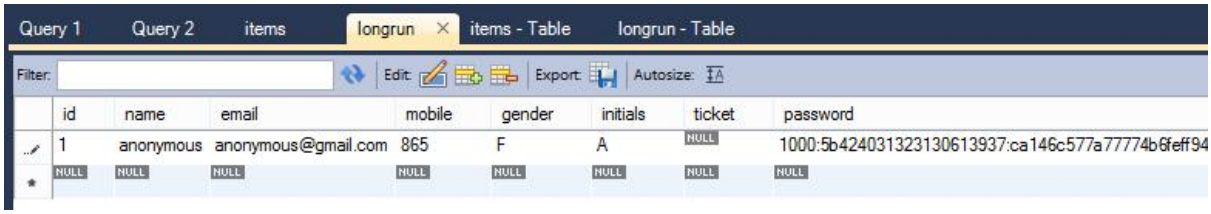
MODULE 1
(Data model)

The database contains relational table storing information about all items provided by the store.



The database also stores information about the user which is later used to provide authentication.





MODULE 2
(UI Design)

LOGIN.JSP

This page is used for login the user in the application for accessing the data allowed to them.

SIGNUP.JSP

This page is for registering new users in the available system. The user needs to fill 4 fields:

A)Full Name

B)Email

C)Password. and

D)Confirm Password

The email provided should be unique. Also the data in the field password and confirm password should match. Otherwise there should be a popup regarding the corrections required.
